# APPLICATION FOR COMMODITY CLEARANCE OF GENETICALLY MODIFIED ORGANISMS (GMO)

# PART I

- BRIEF DESCRIPTION OF THE GENETICALLY MODIFIED ORGANISM
  - 1.1 Include specific and common names of the organism, the country of origin of the plant and a description of the genetically modified trait.

## 2. COMMODITY CLEARANCE

- 2.1 Please indicate the type of clearance requested.
- 2.2 Detail specific instructions for the storage and handling of the plant or plant parts.
- 2.3 When will commodity import take place?
- 2.4 Where will commodity import take place?
- 2.5 Detail the type of environment and the geographical areas for which the plant is suited.
- 2.6 Who will undertake the commodity import?
- 2.7 Estimate the amount of production of the genetically modified plant within South Africa per annum, or the amount that will be imported into South Africa per annum.

## DESCRIPTION OF ANY PRODUCT DERIVED FROM THE PLANT

3.1 Identify the part of the plant to be used for the product, the type of product, and the use of the product, the market sector in which the product will be marketed and the tradename of the product.

- 3.2 Specify the exact conditions of use of the product.
- 3.3 Provide information on the proposed labelling of the product for marketing.
- 3.4 State whether the benefits of the product are available in any other nongenetically modified form. If so, state why the genetically modified form should be approved for general release when other, non-modified products are available.
- 3.5 Detail specific instructions for the storage and handling of GMO's that will avoid misuse or escape of the genetically modified plant into an environment for which it was not intended.
- 3.6 Detail the likelihood of the GMO being exported from South Africa, particularly if such export could result in the introduction of the plant into its centre of origin.

## 4. FOREIGN GENES AND GENE PRODUCTS

- 4.1 Identify all foreign genes in the genetically modified plant.
- 4.2 Describe the gene products that are derived from the foreign genes.
- 4.3 Describe the biological activity associated with the foreign gene products.
- 4.4 Provide information on the rate and level of expression of the foreign genes and the sensitivity of the measurement of the rate and level. State whether expression is constitutive or inducible. Are foreign genes expressed throughout the plant or only in certain organs or tissues?
- 4.5 Provide protocols for the detection of the foreign genes in the environment including sensitivity, reliability and specificity of the techniques.

## **5.** RESISTANCE

- 5.1 Detail whether the genetically engineered plant is able to initiate resistance, in any biotic component of the environment, to any biologically active foreign gene product.
- 5.2 Detail what methods are available to minimise the risk of resistance developing in the environment.
- 5.3 Detail how resistance will be managed during release of the genetically modified plant.

## 6. HUMAN AND ANIMAL HEALTH

Please take cognisance of the requirements pertaining for food and feed safety, as contained in sections 5.1 and 5.2 of the guidelines for use of GMO's (available on website of DoA). You are required to follow these guidelines in compiling the information for your application.

- 6.1 State whether the genetically modified plant or its products will enter human or animal food chains.
- 6.2 Detail the results of experiments undertaken to determine the toxicity of the foreign gene products (including marker genes) to humans and animals.
- 6.3 If the foreign gene products are toxic or allergenic in any way, detail how the commodity clearance will be managed to prevent contact with animals or humans that will lead to discomfort or toxicity.
- 6.4 What are the implications of the proposed activity with regard to the health and safety of the workers, cleaning personnel and any other person, that will be directly or indirectly involved in the activity? Please take into consideration the provisions of the Occupational Health and Safety Act, 1993 (Act No. 181 of 1993) and accompanied regulations.
- 6.5 Indicate the proposed health and safety measures that would be applied to safeguard employees during the proposed activity.

## 7. ENVIRONMENTAL IMPACT AND PROTECTION

- 7.1 Detail any long-term effect the commodity clearance of the genetically modified organism is likely to have on the biotic and abiotic components of the environment.
- 7.2 Provide data and information on ecosystems that could be affected by use of the plant or its products.
- 7.3 Specify what effect the general release of the genetically modified plant will have on biodiversity.
- 7.4 Specify the measures to be taken in the event of the plant or product being misused or escaping into an environment for which it is not intended.
- 7.5 If the foreign genes give rise to crops resistant to agrochemicals, provide information on the registration of the agrochemicals to be used on the crop.

#### 8. SOCIO-ECONOMIC IMPACTS

8.1 Specify what, if any, positive or negative socio-economic impacts the genetically modified plant will have on communities in the proposed region of release.

# 9. WASTE DISPOSAL

9.1 Where only a portion of the genetically modified plant will be used for the product, how will the unused plant parts be disposed of?

# 10. MONITORING AND ACCIDENTS

- 10.1 Indicate the methods and plans for monitoring of the GMO
- 10.2 Indicate any emergency procedures that will be applied in the event of an accident

# 11. PATHOGENIC AND ECOLOGICAL IMPACTS

11.1 Submit an evaluation of the foreseeable impacts, in particular any pathogenic and ecologically disruptive impacts.

## **12.** RISK MANAGEMENT

- 12.1 Please indicate any risk management measures that would be required during the trial.
- **13.** COMPLETE THE AFFIDAVIT. The affidavit is an inseparable part of the application form.

# **Directions for the applicant:**

(This page must be excluded from the documents to be submitted to the Registrar's office)

- Please complete all relevant sections of the questionnaire CLEARLY.
- Please provide 1 original and 11 copies of the application with confidential information for use by the regulatory bodies appointed in terms of the Genetically Modified Organisms Act, 1997 (Act no. 15 of 1997).
- Please provide an additional hard copy of the application containing no confidential information. The latter application will be made available for public scrutiny.
- Please provide an electronic and hard copy of a risk assessment conducted in accordance with Annex III of the Cartagena Protocol on Biosafety and in the format prescribed below.
- Please conduct a public notification in accordance with Regulation 6 of the GMO
  Act, and making use of the guideline document available on the website of the
  department. Copies of the public notification must be submitted with the
  application.
- Please submit all relevant documentation to the Registrar at the address indicated in the application form.
- The appropriate fee stipulated under the GMO Act must accompany the application. Please note that the Registrar's office does not accept cash.

## **COMMON FORMAT FOR Risk Assessment**

(In accordance with Annex III of the Cartagena Protocol ion Biosafety)

Risk assessment details				
1.	Country Taking Decision:	South Africa		
2.	Title:	<text entry=""></text>		
3.	Contact details:	<standard (job="" address="" address,="" contact="" designation),="" details:="" email,="" fax,="" function="" name,="" organization,="" phone,="" title="" website=""></standard>		
LMO information				
4.	Name and identity of the living modified organism:	<text and="" between="" biological="" characteristic="" differences="" entry="" identity="" living="" modified="" of="" or="" organism="" organism,="" organisms="" parental="" recipient="" the="" those="" –=""></text>		
5.	Unique identification of the living modified organism:	<text entry=""></text>		
6.	Transformation event:	<text entry=""></text>		

7. Introduced or	Choose the trait from the following list:				
Modified Traits:	A. <u>Abiotic environmental tolerance</u>				
	<ul> <li>Altered photoperiod sensitivity</li> <li>Cold or heat tolerance</li> <li>Drought or water tolerance</li> <li>Other abiotic environmental tolerance</li> <li>B. Altered growth, development and product quality</li> </ul>				
	<ul> <li>Altered ripening or flowering</li> <li>Coloration</li> <li>Fertility restoration</li> <li>Growth rate or yield</li> <li>Male sterility</li> <li>Nutritional composition (inc. allergenicity)</li> <li>Other growth, development and product quality</li> <li>Selectable marker genes and reporter genes</li> <li>Uptake or degradation of environmental pollutants</li> <li>Chemical tolerance</li> <li>Herbicide tolerance</li> <li>Other chemical tolerance</li> <li>Medical products</li> <li>Animal vaccines</li> <li>Development of transplant organs</li> <li>Other medical products</li> <li>Production of pharmaceuticals</li> <li>Pest resistance</li> <li>Bacterial resistance</li> <li>Insect resistance</li> <li>Nematode resistance</li> <li>Other pest resistance</li> <li>Virus resistance</li> <li>virus resistance</li> <li>and</li> <li><text entry="" for="" list="" not="" on="" other,="" the=""></text></li> </ul>
