SECTION A

ECONOMIC INDICATORS AND TRENDS

1. CROP ESTIMATES AND FORECASTS

Preliminary estimate of areas planted to summer field crops for the 2024 production season

The preliminary estimate of areas planted to summer crops for the 2024 production season was released by the Crop Estimates Committee (CEC) on 30 January 2024.

The estimate for maize was 2,638 million ha, which is 2,00% more than the 2,586 million ha planted the previous season and 0,04% more than the intended plantings figure of 2,637 million ha released in October 2023.

The area estimate for white maize was 1,557 million ha, which represents an increase of 2,36% from the 1,521 million ha planted for the 2023 season. In the case of yellow maize, the area estimate was 1,080 million ha, which is 1,47% more than the 1,065 million ha planted for 2023.

The preliminary area estimate for sunflower seed was 613 200 ha, which is 10,35% more than the 555 700 ha planted the previous season. It was also estimated that 1,037 million ha had been planted to soya beans, which represents a decrease of 9,73% from the 1,148 million ha planted for the 2023 season.

For groundnuts, the area estimate was 41 200 ha, which is 31,63% more than the 31 300 ha planted the previous season. The area planted to sorghum increased by an estimated 16,47%, from 34 000 ha to 39 600 ha. In the case of dry beans, the area estimate was 39 400 ha, which is 7,50% more than the 36 650 ha planted the previous season.

Preliminary estimate of areas planted to summer grain crops: 2024.

Crop	Area planted 2024	Area planted 2023	Final crop 2023	Change in area 2024 vs 2023
	ha	ha	tons	%
White maize	1 557 250	1 521 300	8 505 000	+2,4
Yellow maize	1 080 500	1 064 800	7 925 000	+1,5
Maize	2 637 750	2 586 100	16 430 000	+2,0
Sunflower seed	613 200	555 700	720 000	+10,4
Soya beans	1 036 600	1 148 300	2 770 000	-9,7
Groundnuts	41 200	31 300	53 000	+31,6
Sorghum	39 600	34 000	94 360	+16,5
Dry beans	39 400	36 650	50 260	+7,5

Sixth production forecast for winter field crops for 2023

According to the sixth production forecast of winter crops, also released by the CEC on 30 January 2024, the expected wheat crop for 2023 was 2,089 million tons, which is 0,98% or 20 775 tons less than the 2,110 million tons of the previous season. The expected yield was 3,88 t/ha, compared to 3,72 t/ha the previous season. The area estimate for wheat was 537 950 ha, as against 566 800 ha for 2022—a decrease of 5,09%.

The main contributing provinces to the expected wheat crop were Western Cape, with a production forecast of 1,095 million tons (52,41%), followed by Northern Cape with 300 000 tons (14,36%) and Free State with 295 200 tons (14,13%). The expected yield for Western Cape was 3,00 t/ha, which is 17,65% higher than the 2,55 t/ha of the previous season. A yield of 7,50 t/ha was expected for Northern Cape, which is 4,17% higher than the 7,20 t/ha for 2022. The expected yield for Free State was 4,10 t/ha, compared to 4,55 t/ha the previous season—a decrease of 9,89%.

The production forecast for malting barley was 376 195 tons, which is 24,57% or 74 195 tons higher than the 302 000 tons of the previous season. The area planted was estimated at 107 600 ha and the expected yield was 3,50 t/ha.

The expected canola crop was 237 450 tons, while the area estimate was 131 200 ha, with an expected yield of 1,81 t/ha.

The expected crop for oats for the 2023 season was 40 250 tons and the area estimate was 27 500 ha. The expected yield was 1,46 t/ha.

In the case of sweet lupines, the production forecast was 16 000 tons. The area estimate was 16 000 ha, with an expected yield of 1,00 t/ha.

Estimated areas planted and sixth production forecast for winter cereals: 2023.

Crop	Area planted 2023	Sixth forecast 2023	Area planted 2022	Final crop 2022	Change in production 2023 vs 2022
	ha	tons	ha	tons	%
Wheat	537 950	2 089 225	566 800	2 110 000	-1,0
Barley	107 600	376 195	101 000	302 000	+24,6
Canola	131 200	237 450	123 510	210 000	+13,1
Oats	27 500	40 250	27 000	27 550	+46,1
Sweet lupines	16 000	16 000	21 000	15 750	+1,6

2 ECONOMIC INDICATORS OF THE SOUTH AFRICAN AGRICULTURAL SECTOR

Indicator (at current prices)	Jan. to Dec. 2022	Jan. to Dec. 2023	% change
Total gross farming income (R million)	421 210	443 093	+5,2
Intermediate expenditure (R million)	233 914	266 391	+13,9
Total farming cost (R million)	312 422	349 790	+12,0
Net farming income (R million)	116 137	101 167	-12,9
Domestic terms of trade (2015 = 1)	1,00	1,12	+12,0

Gross income from major products at current prices

	Jan. to Dec. 2022	Jan. to Dec. 2023	Change
Field crops:	R million		%
Maize	64 670	55 031	-14,9
Wheat	12 816	11 651	-9,1
Sugar cane	12 037	14 851	+23,4
Sunflower seed	8 661	6 210	-28,3
Cotton	376	403	+7,2
All field crops	128 876	118 098	-8,4
Horticulture:			
Vegetables (including potatoes)	30 417	39 495	+29,8
Deciduous and other fruit	31 662	38 813	+22,6
Citrus fruit	27 562	33 841	+22,8
Viticulture	7 437	7 213	-3,0
Subtropical fruit	6 562	7 239	+10,3
All horticultural products	115 225	138 732	+20,4
Animal products:			
Poultry meat	59 008	65 768	+11,5
Cattle and calves slaughtered	49 324	45 537	-7,7
Milk	23 797	26 907	+13,1
Eggs	12 600	14 179	+12,5
Sheep slaughtered	8 890	8 409	-5,4
All animal products	177 109	186 263	+5,2

3. ECONOMIC OVERVIEW

This article gives an overview of the major macroeconomic trends in the agricultural sector for the period 1 January to 31 December 2023. Aggregates are compared with the period 1 January to 31 December 2022.

Gross farming income

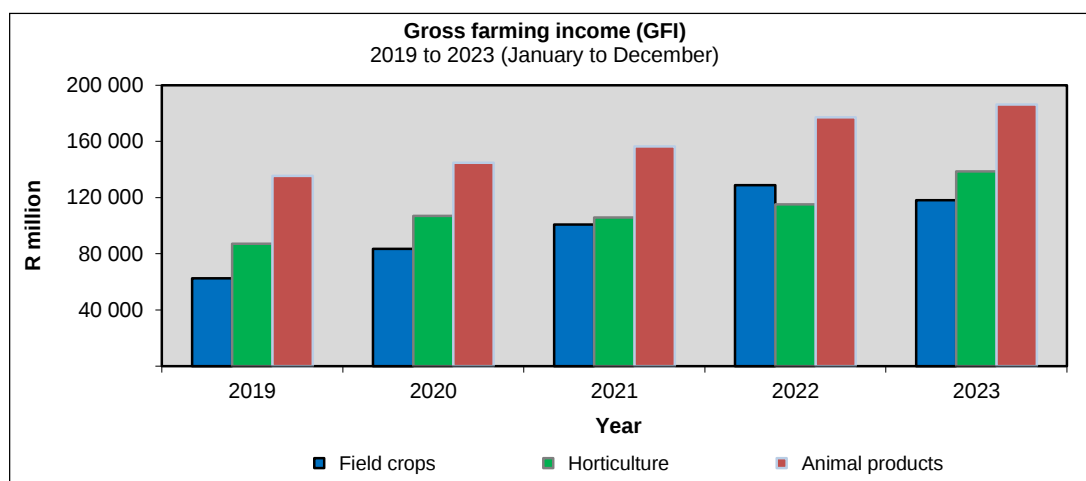

Gross farming income refers to both the part of agricultural production that is marketed and production for own consumption, valued at basic prices.

Total gross farming income that was earned from all agricultural products increased by 5,2% and was approximately R443 093 million in 2023 as compared to R421 210 million in 2022, which can be attributed to the increase in income from horticultural and animal products by 20,4% and 5,2%, respectively.

Income from field crops decreased by 8,4% and amounted to R118 098 million, as a result of the decrease in income derived from hay (38,1%), sunflower seed (28,3%), grain sorghum (16,5%), maize (14,9%), canola (11,0%) and wheat (9,1%). Income from sugar cane increased by 23,4%, dry beans (10,9%), groundnuts (10,4%), soya beans (8,6%) and cotton (7,2%).

Income from horticultural products increased drastically by 20,4% to R138 732 million due to the increase in income from vegetables by 29,8%, citrus fruit by 22,8%, deciduous and other fruit by 22,6% and subtropical fruit by 10,3%.

The increase of 5,2% from animal products was the result of the increase in income earned mainly from milk by 13,1%, eggs by 12,5% and poultry meat by 11,5%.

Expenditure on intermediate production inputs

Expenditure on intermediate production inputs refers to the value of the goods and services that were purchased to be consumed as inputs during the production process.

The expenditure on intermediate goods and services increased by 13,9% and was estimated at R266 391 million in 2023, as compared to R233 914 million in 2022, which was driven by the increase in expenditure on fertilisers by 22,0%, farm feed by 20,0%, seed and plants and building and fencing material by 10,0% each, animal health and crop protection by 8,8%, maintenance and repairs of machinery and implements by 8,0%, packing material by 7,9%, farm services and fuel by 6,0% each.

In terms of proportion, farm feeds remained the major expenditure item with a share of 39,6% of the total expenditure, followed by fertilisers (12,0%), farm services (9,2%), fuel (7,8%), maintenance and repairs of machinery and implements (6,4%), seed and plants (6,3%), building and fencing material (3,9%), animal health and crop protection (3,8%) and packing material (3,7%).

Prices received and paid by farmers as well as terms of trade.

The prices received by farmers for their products increased by 7,0%, largely because of the increase in prices of horticultural and animal products by 18,2% and 6,7%, respectively.

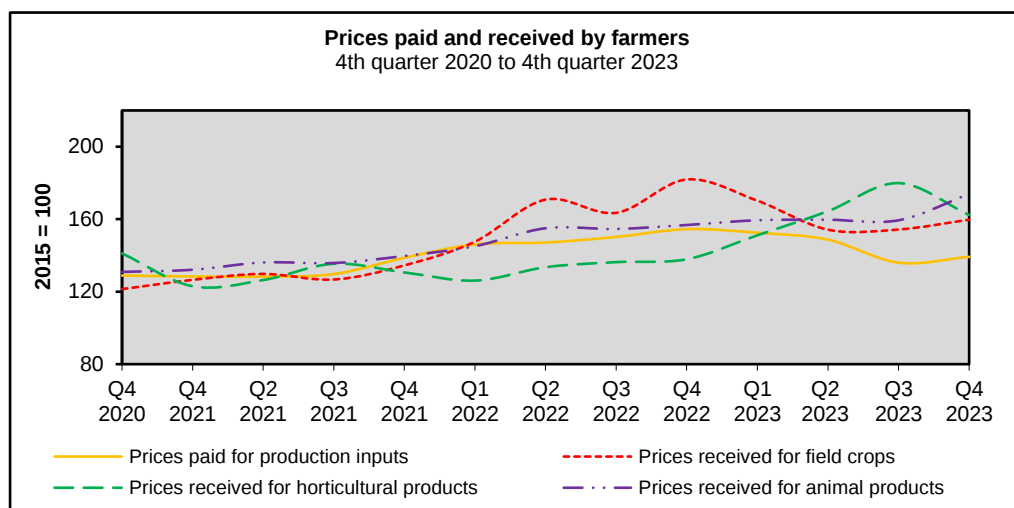

The weighted average price of field crops decreased by 3,8% due to the decrease in prices summer grains by 11,8%, tobacco (9,4%) and oilseeds (4,8%). The prices of sugar cane increased significantly by 20,5%, dry beans (17,6%), hay (6,0%), cotton (2,5%) and winter grains (1,4%).

The weighted average price of horticultural products increased by 18,2%, mainly because of the increases in prices of vegetables by 23,9%, fruit by 15,3% and viticulture by 10,4%.

The weighted average price of animal products increased by 6,7%, which was driven by the increases in the prices of poultry meat by 19,2% and milk by 15,9%. The prices of slaughtered stock and pastoral products decreased by 7,3% and 7,1%, respectively.

The prices paid for farming requisites, including machinery and implements, material for fixed improvements as well as intermediate goods, decreased by 3,6%, which was the result of the decrease in prices of fertilisers by 14,4%, animal health and crop protection by 10,2% and fuel slightly by 0,2%.

The terms of trade increased by 11,0% from 1,00 in 2022 to 1,12 in 2023, mainly as the result of the decrease of 3,6% in production costs as opposed to an increase of 7,0% in prices received for the agricultural products.

Net farming income and cash flow

The gross farming income increased by 5,2% as expenditure on production inputs increased substantially by 13,9%, which caused the net farming income to decrease drastically by 12,9%. The interest payment increased by 10,8%, rent payment by 6,0% and labour remuneration by 5,9%.

The farmers' cash flow decreased significantly by 13,9% and estimated at R97 317 million in 2023 compared to R112 994 million in 2022.

Conclusion

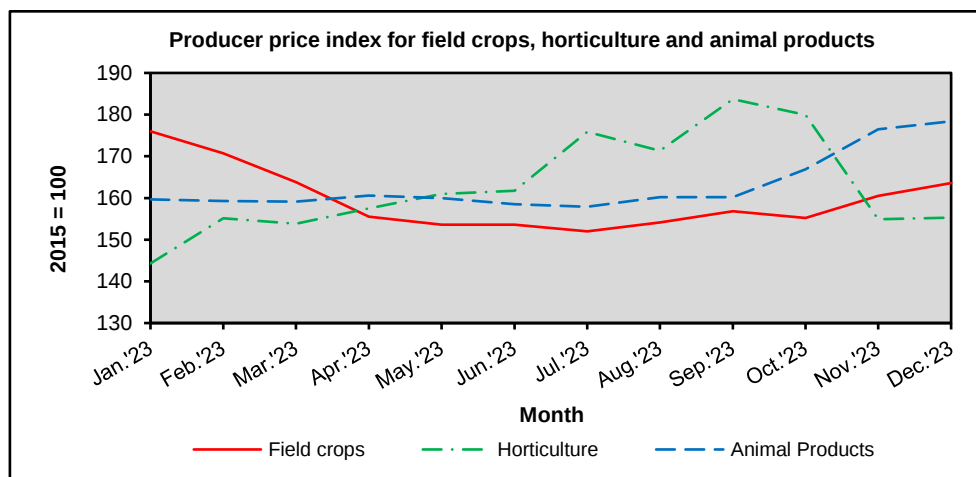

A 5,2% increase in gross farming income was caused by the increase in income earned from both horticultural and animal products by 20,4% and 5,2%, respectively. Despite decreases in output levels of horticultural products by 3,3% and animal products by 2,7%, the gross income was largely driven by the increase in prices of these products.

Although the prices of production inputs such as fertilisers and animal health and crop protection decreased significantly, the farming expenses have increased drastically and eroded the profitability of farmers in 2023.

SECTION B

FRESH PRODUCE MARKETS OVERVIEW

FRESH MARKET STATISTICS OF SEASONAL FLUCTUATIONS IN QUANTITIES AND PRICES OF FRUIT AND VEGETABLES SOLD ON THE MAJOR FRESH PRODUCE MARKETS

The purpose of this overview is to show the short-term price and volume trends (seasonal fluctuations) of various types of fruit and vegetables sold on major fresh produce markets and to make comparisons between the markets.

Market prices are determined by the interaction between supply and demand, which is influenced by various factors. Supply factors include climate, seasonal production, perishability of products and producers' reaction to prices realised in preceding periods, etc. Demand factors include consumer preferences, substitution between products and per capita income. Therefore, the seasonal pattern of quantities sold, and prices realised, may differ considerably among the various markets.

Detailed information regarding fruit and vegetables sold on the markets is available on request from:
Directorate: Statistics and Economic Analysis.

Tel no: 012 319 8453

Fax: 012 319 8031
