The products in this list, should fit the criteria under which it shall be certified (as per proposed certificate for pork products for unrestricted sale number 5 a, b and c) and should be anatomically recognisable on arrival in South Africa.

PRODUCTS INDIVIDUALLY AGREED UPON

1. Bone-in or deboned meat free of lymph nodes and excessive connective tissue (must be certifiable and recognizable as such). The individual cuts and packaging will be specified on the import permit and health certificate.

Bone-in or deboned meat free of lymph nodes and excessive connective tissue (must be certifiable and recognizable as such)

Description	Anatomical description
Pork spareribs (sideribs)	The spareribs contain 10 (costal) rib bones from the 5th ribs to the 14th ribs, including the intercostal meat and the rib cartilages without the sternum bone. The spareribs are removed from the belly, without the diaphragm (skirt meat). The cut shall exclude the vertebrae in its entirety.
